Market vendor mix:

There is no vendor exclusivity, however the manager and advisory committee do carefully manage the market mix as a way to not saturate the market, allowing all vendors to have an ample opportunity to sell their products. This is especially important with niche and specialty items. The market takes our vendors success seriously, therefore some the sale of some products may be “closed” if we feel it isn’t advantageous for the vendor or the market if we add additional vendors selling the same product.

The following limits are placed on vendors falling into these specific categories:

Based on full season vendor roster for the market season, not by individual week

10% - Art & Craft

15% - Homebased Bakery

10% - Pickle Bill
