THE ABC'S OF BIKING

AIR

- Check air pressure in your tires by squeezing the tires to be sure they are firm.
- Fill tires to the recommended PSI (located on the side of tire).

BRAKES

- Test your brake levers to make sure they work. If they touch the handlebars, they make need to be adjusted.
- Check to see that the brake pads are clean, straight and contact the tire rims properly.

CHAIN, COGS, AND CRANK

- Keep chain free of rust and gunk, and moving easily between cogs on the gears.

- Tighten crank bolts if needed. All moving parts should be properly lubricated with bike chain lubrication.

- The crank arm (a metal lever connecting the pedal to the bottom bracket axle) shouldn't wiggle.

RIDE SMART

BIKE LOCKS

- Bike Locks (U-Lock or other heavy duty bike lock.) Secure both wheels and frame to a bike rack or immovable pole. Do not lock to trees or block accessible walkways.

GEAR SAFETY

RIDING TIPS

GENERAL TIPS

- Make eye contact with drivers.
- Stay aware of your environment.
- Limit distractions such as earphones.
- Bicycles may use a full traffic lane to avoid unsafe conditions but should take care to stay to the right hand edge of the road.
- When passing someone that is coming straight at you, slow down and yield to slower moving users such as pedestrians, or people using mobility aids.

BE PREDICTABLE

- Use hand signals when changing lanes, turning, or stopping to keep everyone safe.
- Bicyclists must signal with intention to turn within 50 feet prior to making the turn as long as signaling doesn't interfere with the operation of the bicycle.

GROUP RIDING

- Group riding, or riding two abreast, is allowed but should take care to stay to the right-hand edge of the road.
- When there is motorized traffic, switch to single file.

SOUND OUT

- When passing others from behind, tell them you are a bicyclist "on your right" or "on your left".
- When passing someone that is coming straight at you, slow down and yield to slower moving users such as pedestrians, or people using mobility aids.

YIELD

SUN PRAIRIE REVOLVES AROUND YOU

Explore bars and restaurants on your ride. Over 60 local favorites and classic chains can be explored on wheels. Looking for more adventure? Check out unique visits like the "Georgia O'Keeffe Historic Tour", food tours and more. Scan the QR code to unlock a world of fun in Sun Prairie.

ACCIDENTS

HAZARDS & EMERGENCIES

- IN A CRASH?**
- If you are in pain, stay put so you don't further injure yourself.
 - Call 9-1-1 or tell someone to call for you.
 - If your crash involves a car, make sure to get the driver's contact info, license plate, and insurance info.
 - Go to the hospital for any injuries.
 - Document everything: Witness info, the responding officer's badge number, your trips to the hospital and all corresponding expenses related to your crash.

NIGHT RIDING

Wear lights, reflective clothing, and ride with others. A front light and rear reflectors are required when riding at night.

EMERGENCIES

Call 9-1-1 or tell someone else to call for you.

RIDING WITH E-BIKES AND E-SCOOTERS

E-SCOOTERS

- Devices that weigh less than 100 pounds, have handlebars, and are powered entirely by an electric motor with a maximum speed of 20 miles per hour.
- E-scooters can be used in the street, in bike lanes, on the sidewalk, or on paths in Sun Prairie.

E-BIKES

- A bicycle with working pedals that requires human power to operate. Has an electric motor of 750 watts or less and a maximum speed of 28 miles per hour.

E-MOTOS

- E-motos are electric mobility devices with top speeds that exceed 28 miles per hour. These devices are not legal to use on the street, sidewalks, paths, or bike lanes.

GENERAL TIPS

- Take time to become familiar with how e-bikes and e-scooters accelerate and brake.
- Check the charge before you go. Remember cold weather can reduce battery power.
- Wisconsin law requires Class 3 e-bike users be at least 16 years old. No age restrictions for Class 1/2 e-bikes or e-scooters.
